Comments:

This fluid was used to re-enter the old McClain #2-3 well, and perforate the Cedar Hills Water Sand Formation at 1440 - 1520. Total Depth in this re-entry is 1750 feet, Plug Back TD is 1722. A steel pit was used in this re-entry operation, and I believe this was all the fluid used to re-enter and drill to TD.
