October, 1939.

Bradley #1 Dolechek,
C EL SE NW, 26-16S-12W,
El. 1918'.

Pennsylvanian conglomerate, 3379-3415'.

3379-3385	Sandy lime and coarse sand.
3385-3388	Coarse sand and stained and weathered chert.
3388-3415	Red clay, weathered chert, rare sand. Rotary samples not good enough to determine if this is bedded material or residuum but there is a stron g suggestion that it is residuum and includes Cotter material.

Arbuckle Top 3415' Penetration 11' Sub-sea, minus 1497'

3415-3426	Dolomite, white, coarse.	Pre-Cotter.

Top Pre-Cotter can not be restored with any accuracy. It is probably -1450' or higher.
