SUMMARY AND RECOMMENDATIONS

This well was drilled as a Chase gas well. No samples were examined. Structural position indicate probable commercial gas production from the Chase. Based upon available data 5 ½" production casing was set.

Pipe was set 1 foot off bottom @ 2274'. The following zones are recommended for testing.

1. Chase 2198-2202
2. Chase 2183-2186

Measurements were taken from rotary kelly bushing (8 feet above ground level). Driller's measurements are taken as correct.

Respectfully,

Scott Corsair
Petroleum Geologist
