Date of closure: 6/16/2020

Was an artificial liner used? ☐ Yes ☑ No

If no, how were the sides and bottom sealed to prevent downward migration of the pit contents?

Initial request was to leave as a water source for livestock. The result of the water holding was to high in chlorides. The state would not approve it as a water source because of the chlorides. When the pit went dry it was filled back in with the original subsoil and then covered with original topsoil.

Abandonment procedure of pit:

Filled back with original subsoil then covered with original topsoil.
