Date of closure: 7/8/2020

Was an artificial liner used? ☐ Yes ☑ No

If no, how were the sides and bottom sealed to prevent downward migration of the pit contents?

Sealed with clay soil, native and fresh mud.

Abandonment procedure of pit:

Allowed liquid contents to evaporate, let cuttings dry and backfilled after the following procedures were done.

Since pits would not dry out from rainfall within the 365 day time limit for closure (and after closure extensions and legal exceptions were granted to extend closure dates) the KCC District #3 office instructed us to dig trenches and allow rainfall to drain from the pits.
