l		· · · · · · · · · · · · · · · · · · ·		······	1980' FSL	

NOTE: In all cases locate the spot of the proposed drilling locaton.

# 765 ft.

#### In plotting the proposed location of the well, you must show:

- 1. The manner in which you are using the depicted plat by identifying section lines, i.e. 1 section, 1 section with 8 surrounding sections, 4 sections, etc.
- 2. The distance of the proposed drilling location from the south / north and east / west outside section lines.
- 3. The distance to the nearest lease or unit boundary line (in footage).
- 4. If proposed location is located within a prorated or spaced field a certificate of acreage attribution plat must be attached: (C0-7 for oil wells; CG-8 for gas wells).
- 5. The predicted locations of lease roads, tank batteries, pipelines, and electrical lines.

<sup>#</sup> Controlling data is based upon the best maps and photographs available to us and upon a regular section of land containing 640 acres.

levations derived from National Geodetic Vertical Datum.

May 26. 2011

Approximate section lines were determined using the normal standard of care of oilfield surveyors practicing in the state of Kansas. The section corners, which establish the precise section lines, were not necessarily located, and the exact location of the drillsite location in the section is not guaranteed. Therefore, the operator securing this service and accepting this plat and all other parties relying thereon agree to hold Central Kansas diffield Services, inc., its officers and employees harmless from all losses, costs and expenses and said entities released from any liability from incidental or consequential damages.
