• Controlling data is based upon the best maps and photographs available to us and upon a regular section of GPS controlling 840 acres.
 • Approximate section lines were determined using the normal standard of care of oilfield surveys practiced in the state of Kansas. The section corners, which establish the precise section lines, were not necessarily located, and the exact location of the drillsite location in the section is not guaranteed. Therefore, the operator, acquiring this service and accepting this plat and all other plat documents, shall hold Central Kansas Oilfield Services, Inc., its officers and employees harmless from all losses, costs and expenses and sole entities released from any liability from incidental or consequential damages.
 • Elevations derived from National Geospatial Vertical Datum.
