KCC – Conservation Division 130 S. Market Street Room 2078 Wichita, KS 67202

RE: Water well in Section 2-15S-20E

To Whom It May Concern:

In regard to the water well located in the NE/4 NE/4 SE/4 of Section 2-15S-20E, completed August 18, 1981, Altavista Energy has determined that it is not in the stated location and is no longer in use.

In the last 90 days, Altavista Energy has intented 7 wells, thus far, that are theoretically within 660 feet of the water well in question. For the first well, we sent a letter to the landowner and did not receive a response. For the ensuing wells, we felt it would be best to talk with the landowner, Frank Turley, regarding the well, to be sure it wasn't an issue for him. Mr. Turley stated that the well was in fact on his property, and that he had plugged it many years ago and built a garage over where it used to be. He also stated that he had no concerns with our drilling activity, and gets all of his water from a rural water meter now.

Additionally, based on our mapping the well was originally located at approximately Lat. 38.77390, Lon. -95.15285 based on the NAD83 coordinate system. This would put the well more than 660 feet from any additional wells we are drilling, including those on the Baldwin Unit lease.

NOTICE TO OPERATORS FILING INTENT TO DRILL FOR DISPOSAL OR ENHANCED RECOVERY INJECTION WELLS, (CLASS II INJECTION WELL)

The attached approved Notice of Intent to Drill indicates the proposed well is to be used for injection. An approved "Intent to Drill" does not approve injection authority as a Class II Injection Well in Kansas.

Before any well is used for injection purposes, the operator must file an application for injection authority in accordance with K.A.R. 82-3-401 and provide notice in accordance with K.A.R. 82-3-402. The Conservation Division must issue a written permit granting the application before commencement of injection.

The Conservation Division requirements and restrictions associated with Class II Injection are identified in K.A.R. 82-3-400 et seq of our regulations. Associated regulations governing drilling, completion and injection applications may be found in K.A.R. 82-3-135, Table I, Table II, in the Cedar Hills Sandstone Moratorium, (Docket #156,397-C), and the Eastern Kansas Surface Casing Order, (Docket #133,891-C).

If you have questions regarding the approval of injection authority, an injection application may be filed as a "Design Approval" before actual drilling and completion of the well occurs. If you have any questions or concerns regarding Class II injection wells or regulations, call the Underground Injection Control Department at 316-337-6200.

Failure to obtain commission approval before beginning injection is punishable by a penalty, shut-in of the well or both.
