• Controlling data is based upon the best data and information available in an area upon a regular section of land containing said lands.  
• Appropriate section lines were determined using the National Standard of Care at Oilfield Surveying practices in the state of Kansas. The section corners, which establish the precise section lines, were not located in the field, and the exact location of the drilled location in the section is not established. Therefore, the operator should verify the location and measure this site and all other drillsite marking markers on said Central Kansas Oilfield Services, Inc. The operator and employees shall not be liable from oil, gas, water and subsurface and shall not be released from liability from the incident of consequential damages.  
• Elevations are given from National Geodetic Vertical Datum.

### PLAT

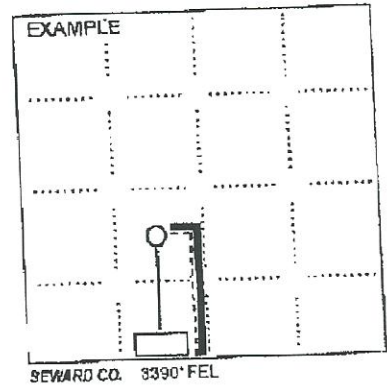

Show location of the well. Show footage to the nearest lease or unit boundary line. Show the predicted locations of lease roads, tank batteries, pipelines and electrical lines, as required by the Kansas Surface Owner Notice Act (House Bill 2032). You may attach a separate plat if desired.

NOTE: In all cases locate the spot of the proposed drilling location.

### LEGEND

- Well Location
- Tank Battery Location
- Pipeline Location
- Electric Line Location
- Lease Road Location

In plotting the proposed location of the well, you must show:

1. The manner in which you are using the depicted plat by identifying section lines, i.e. 1 section, 1 section with 8 surrounding sections, 4 sections, etc.
2. The distance of the proposed drilling location from the south / north and east / west outside section lines.
3. The distance to the nearest lease or unit boundary line (in footage).
4. If proposed location is located within a prorated or spaced field a certificate of acreage attribution plat must be attached: (CO-7 for oil wells; CG-8 for gas wells).
5. The predicted locations of lease roads, tank batteries, pipelines, and electrical lines.
