In plotting the proposed location of the well, you must show:

- 1. The manner in which you are using the depicted plat by identifying section lines, i.e. 1 section, 1 section with 8 surrounding sections, 4 sections, etc.
- 2. The distance of the proposed drilling location from the south / north and east / west outside section lines.
- 3. The distance to the nearest lease or unit boundary line (in footage).
- 4. If proposed location is located within a prorated or spaced field a certificate of acreage attribution plat must be attached: (C0-7 for oil wells; CG-8 for gas wells).

330 ft.

5. The predicted locations of lease roads, tank batteries, pipelines, and electrical lines.

NOTICE

Nearest Lease or Unit Boundary Line

K.A.R. 82-3-108 provides that all oil and gas well locations must comply with setback requirements, unless an exception has been granted by the Commission. Depending upon whether the subject well is an oil well or gas well, and also depending upon the county in which the well is located, the setback may be 330 feet or 165 feet from the nearest lease or unit boundary.

This Intent to Drill ("C-1") form indicates that the distance between the well and the nearest lease or unit boundary will comply with the setback requirement. Accordingly, the C-1 has been approved. However, the C-1 also stated that the well location is very near a boundary line of a Section or a Quarter-Section. This notice is being sent as a courtesy reminder, in case an error was made on the C-1.

As the operator of the proposed well, you must independently verify that the proposed well location complies with the applicable regulatory setback. If at any time it should appear that a well does not comply with the regulatory setback, the well may be subject to being shut-in pending Commission approval of an application for a well location exception. In addition, if such an application is not granted by the Commission, you may be required to plug the well.

If the proposed well location will comply with the regulatory setback, this notice may be disregarded. Please contact the KCC Production Department with any questions or concerns. Conservation Division Finney State Office Building 130 S. Market, Rm. 2078 Wichita, KS 67202-3802

RE: Table I Exception

Denton #14, E2-SE-SE-SE Sec.4-T31S-R8E, Cowley County

Dear Mr. Patteson:

The Kansas Corporation Commission (KCC) has received your request, dated October 8, 2013, for an exception to the Table 1 minimum surface pipe requirement of 450 feet for this proposed well location.

After review of this matter by technical staff it was determined that:

- 1. Bedrock at this location is the Permian Council Grove Group and is located at or near surface.
- 2. The well is located in a topographically low location relative to the surrounding area.
- 3. The nearest water well of record is 264 feet deep at approximately the same elevation as the proposed location.

Based on this information, an exception is granted for the Table 1 Minimum Surface Casing Requirements with the following stipulations:

- 1. Surface casing will be set to a depth of at least 280 feet and cemented to surface. Notify the KCC District #2 office prior to spudding the well.
- 2. In the event the well is dry, plugging will be performed according to KCC rules and KCC District #2 requirements.

Sincerely Yours,

Ryan Hoffman Director

cc: Steve Bond 55

Jeff Klock - Dist #2 Via e-mail
