* Controlling data is based upon the best maps and photographs available to us and used a regular section of land containing 360 acres.
 * Survey/lease section lines were determined using the normal standard of care of oilfield surveyors practicing in the state of Kansas. The section corners, which establish the precise section lines, were not located. The location of the section corners was determined using the best available aerial photography and existing maps and other information available to us. The location of the section corners was determined using the best available aerial photography and other information available to us. The location of the section corners was determined using the best available aerial photography and other information available to us.
 * Classifications derived from horizontal geodetic vertical datum.
