Construction Features

Length of Cathodic Surface (Non-Metallic) Casing

Planned to be set: _____ feet

Length of Conductor pipe (if any): _____ feet

Surface casing borehole size: _____ inches

Cathodic surface casing size: _____ inches

Cathodic surface casing centralizers set at depths of: _____ ; _____ ;

_____ ; _____ ; _____ ; _____ ; _____ ; _____ ; _____ ;

Cathodic surface casing will terminate at:

☐ Above surface ☐ Surface Vault ☐ Below Surface Vault

Pitless casing adaptor will be used: ☐ Yes ☐ No Depth _____ feet

Anode installation depths are: _____ ; _____ ; _____ ; _____ ; _____ ;

_____ ; _____ ; _____ ; _____ ; _____ ; _____ ; _____ ; _____ ;

AFFIDAVIT

The undersigned hereby affirms that the drilling, completion and eventual plugging of this well will comply with K.S.A. 55-101 et. seq.

It is agreed that the following minimum requirements will be met:

1. Notify the appropriate District office prior to spudding and again before plugging the well. An agreement between the operator and the District Office on plugs and placement is necessary prior to plugging. In all cases, notify District Office prior to any grouting.
2. Notify appropriate District Office 48 hours prior to workover or re-entry.
3. A copy of the approved notice of intent to drill shall be posted on each drilling rig.
4. The minimum amount of cathodic surface casing as specified below shall be set by grouting to the top when the cathodic surface casing is set.
5. File all required forms: a. File Drill Pit Application (form CDP-1) with Intent to Drill (form CB-1). b. File Certification of Compliance with Kansas Surface Owner Notification Act (form KSONA-1) with Cathodic Protection Borehole Intent (CB-1) c. File Completion Form (ACO-1) within 30 days from spud date. d. Submit plugging report (CP-4) within 30 days after final plugging is completed.

Email Address: _____

Well Location:
____ - ____ - ____ Sec. ____ Twp. ____ S. R. ____ ☐ East ☐ West
County: _____
Lease Name: _____ Well #: _____
If filing a Form T-1 for multiple wells on a lease, enter the legal description of the lease below:

Surface Owner Information:

Name: _____
Address 1: _____
Address 2: _____
City: _____ State: _____ Zip: _____ + _____

When filing a Form T-1 involving multiple surface owners, attach an additional sheet listing all of the information to the left for each surface owner. Surface owner information can be found in the records of the register of deeds for the county, and in the real estate property tax records of the county treasurer.

If this form is being submitted with a Form C-1 (Intent) or CB-1 (Cathodic Protection Borehole Intent), you must supply the surface owners and the KCC with a plat showing the predicted locations of lease roads, tank batteries, pipelines, and electrical lines. The locations shown on the plat are preliminary non-binding estimates. The locations may be entered on the Form C-1 plat, Form CB-1 plat, or a separate plat may be submitted.

Select one of the following:

- ☐ I certify that, pursuant to the Kansas Surface Owner Notice Act (House Bill 2032), I have provided the following to the surface owner(s) of the land upon which the subject well is or will be located: 1) a copy of the Form C-1, Form CB-1, Form T-1, or Form CP-1 that I am filing in connection with this form; 2) if the form being filed is a Form C-1 or Form CB-1, the plat(s) required by this form; and 3) my operator name, address, phone number, fax, and email address.
- ☐ I have not provided this information to the surface owner(s). I acknowledge that, because I have not provided this information, the KCC will be required to send this information to the surface owner(s). To mitigate the additional cost of the KCC performing this task, I acknowledge that I must provide the name and address of the surface owner by filling out the top section of this form and that I am being charged a \$30.00 handling fee, payable to the KCC, which is enclosed with this form.

If choosing the second option, submit payment of the \$30.00 handling fee with this form. If the fee is not received with this form, the KSONA-1 form and the associated Form C-1, Form CB-1, Form T-1, or Form CP-1 will be returned.

To: Ryan Hoffmann, Director

RE: Exemption to K.A.R. 82-3-702 (b) 4

Director Hoffmann,

This exemption request to the requirements of K.A.R. 82-3-702 (b) 4 relates to a Cathodic Protection ground bed bore per the requirements of the letter of July 20, 2007 to SAE Inc. from Director Doug Louis of the Kansas Corporation Commission, Conservation Division.

The basis of the exemption request is that the backfill material will be Conducrete, a material that has been demonstrated to have essential sealing properties to protect the aquifers of Kansas from contamination processes and pathways. The technical specification pertinent to the sealing properties is shown by independent lab tests revealing a permeability rate of 3.8×10^{-7} cm/sec which is comparable to cements and bentonite sealant materials. Further this has been approved by NSF 60 certification of Conducrete as bore sealant and cathodic protection backfill. This assures that any aquifer traversed by the Conducrete backfill will be sealed without the requirement of any casing.

Further, the inherent safety of the material Conducrete has been demonstrated by independent testing for leachate levels that are well below USA EPA and Canada requirements, and again also by the NSF 60 certification.

Attached are the documents referenced for your review. We respectfully request the exception be granted for the construction of the referenced cathodic protection groundbed included with this letter.

Sincerely

Bobby Marshall

Mr. Dennis McIntaggart
SAE Inc.
19 Churchill Drive
Barrie, Ontario L4N 8Z5

Dear Mr. McIntaggart:

Per your request, commission staff has reviewed your request to utilize the EnvirAnode System to comply with cathodic protection regulations under K.A.R. 82-3-700 et seq. The EnvirAnode system is approved for use except in Groundwater Management Districts (GMD) #2 and #5. You must apply directly to the manager of that GMD for approval. The approval is granted with the following conditions:

- The EnvirAnode System may be utilized in aquifer completions as defined in 82-3-700 (d) and 82-3-702 (b) (3).
- For multiple aquifer completions as defined in 82-3-700 (m), the EnvirAnode System may be used upon submission of a written request, and approval by the director, for an exception to K.A.R. 82-3-702 (b) (4).

Sincerely,

Doug Louis, Director

To: Ryan Hoffmann, Director

RE: Exemption to K.A.R. 82-3-702 (b) 4

Director Hoffmann,

This exemption request to the requirements of K.A.R. 82-3-702 (b) 4 relates to a Cathodic Protection ground bed bore per the requirements of the letter of July 20, 2007 to SAE Inc. from Director Doug Louis of the Kansas Corporation Commission, Conservation Division.

The basis of the exemption request is that the backfill material will be Conducrete, a material that has been demonstrated to have essential sealing properties to protect the aquifers of Kansas from contamination processes and pathways. The technical specification pertinent to the sealing properties is shown by independent lab tests revealing a permeability rate of 3.8×10^{-7} cm/sec which is comparable to cements and bentonite sealant materials. Further this has been approved by NSF 60 certification of Conducrete as bore sealant and cathodic protection backfill. This assures that any aquifer traversed by the Conducrete backfill will be sealed without the requirement of any casing.

Further, the inherent safety of the material Conducrete has been demonstrated by independent testing for leachate levels that are well below USA EPA and Canada requirements, and again also by the NSF 60 certification.

The contractor will fill the hole from 120ft to surface with Neat Cement, plugging the entire hole.

Attached are the documents referenced for your review. We respectfully request the exception be granted for the construction of the referenced cathodic protection groundbed included with this letter.

Sincerely

Bobby Marshall

RE: Request for Cathodic Wellbore Variance
K. A. R. 82-3-702 (b) (4)
MP 55 + 15 El Dorado to Humboldt #1-8" #1
Section 16-T26S-R14E, Woodson County

Dear Sirs:

The Kansas Corporation Commission has received your request, dated July 18, 2014, for an exception to the minimum surface pipe requirement for a multiple aquifer cathodic well bore completion as set out in K.A.R. 82-3-702(b)(4). From your request, the KCC understands that you are requesting to set 20 feet of 10" PVC casing and utilize Conducrete backfill from 300 feet total depth to 120 feet, and neat cement from 120 feet to ground level.

After review of this matter by technical staff it was determined that the proposed construction method will adequately protect fresh and usable water in this area.

Notify the KCC District #3 office prior to spudding the well so they may have the opportunity to witness the well construction procedure.

Sincerely,

Ryan A. Hoffman
Director

cc: Rene Stucky, Production Supervisor
