

## Summary

The location for the Dechant Brothers #1 was found via 3-D seismic survey. The new well ran structurally as expected via the survey. One Drill Stem Test was conducted which recovered commercial amounts of oil from the Basil Cherokee Sand Formation. After all gathered data had been examined the decision was made to run 5 ½ inch production casing to further evaluate the Dechant Brothers #1 well.

### Recommended Perforations

**Primary:**

**Basil Cherokee Sand** (4422' – 4427') **Not Tested**

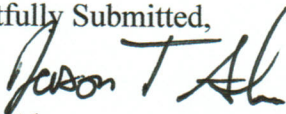

**Secondary:**

**Basil Cherokee Sand** (4412' – 4417') **DST #1**

**Before Abandonment:**

**Fort Scott** (4330' – 4334') **Not Tested**

Respectfully Submitted,
