W & W Production Co., General Partnership (the cementers), plumbed up to the subject well to "cement squeeze", would not take fluid, Colt's pulling unit crew RIH 1" tubing to 1018', W & W connected up to same and circulated cement to the surface, then the 1" tubing was pulled out, the well was "topped off" with cement, afterwards a valve was screwed into the production casing, W & W pressured up to 100 psi, and well was shut-in.

Summary:

Had good cement to surface, Mike Heffern (KCC District #3 representative) was on location and approved the plugging.

Used a total of 29.25+/- sacks of "Portland" (common) cement.
