If well is on a time clock, barrel test and fluid level status should be taken. If possible, after running the well on hand for at least 12 hours, if the well will not over pump. Fluid pound and balance status should be determined before putting the well on hand and/or just prior to the end of a time clock cycle.

- A. Just prior to end of time clock cycle in normal operation.
- B. Number of minutes or hours in time clock cycle?
- C. After well had been left on hand for \_\_\_\_\_ hours.
- D. Well is not on a time clock.
