

To the Kansas Corporation Commission, Oil & Gas Conservation Division.

I, Bobby Marshall, with Matcor, formerly CP Masters, am working with Southern Star Central Gas Pipeline, Inc. to complete the “completion report” for the cathodic ground bed installed 12-12-2016.

I have gone through our records, and have found that all the employees involved with this project are no longer here.

I am giving you information from a note I found in the job folder.

This note stated “pick up 12 bags Portland”.

I also see they air drilled this hole, so they did not use an earth pit.

I am completing this report to the best of my knowledge.
