Proposed WBD for Hayward Farms 18-1 – Dual Completion

- Deeper perforations (Morrow) will flow up the tubing string to the surface and go to it's own separate meter-run coming off of the tubing.
- The shallow perforations (Chase) will be isolated on the backside from the deep perforations with a packer set at 2967'. This shallow gas will flow up the casing/backside to the surge and go to it's own separate meter-run coming off of the casing/annulus.
- Once each zone's gas has been individually meter'd, each zonal gas will flow past a separate check meter and then go down the same gathering line/system.

RE: Approved Dual Completion DC071801  
Hayward Farms 18-1  
API No. 15-129-21918-00-01

Dear Ms Medina:

Your "Application for Dual Completion" (ACO-5) for the above described well has been reviewed and approved by the Kansas Corporation Commission (KCC) per K.A.R. 82-3-124. Notice was examined and found to be proper per K.A.R. 82-3-135a. No protest was filed within the 15-day protest period.

File form ACO-1 upon completion of the well.

Sincerely,

Rick Hestermann  
Production Department
