AFFIDAVIT

The undersigned hereby affirms that the drilling, completion and eventual plugging of this well will comply with K.S.A. 55 et. seq.

It is agreed that the following minimum requirements will be met:

1. Notify the appropriate district office **prior** to spudding of well;
2. A copy of the approved notice of intent to drill **shall be** posted on each drilling rig;
3. The minimum amount of surface pipe as specified below **shall be set** by circulating cement to the top; in all cases surface pipe **shall be set** through all unconsolidated materials plus a minimum of 20 feet into the underlying formation.
4. If the well is dry hole, an agreement between the operator and the district office on plug length and placement is necessary **prior to plugging**;
5. The appropriate district office will be notified before well is either plugged or production casing is cemented in;
6. If an ALTERNATE II COMPLETION, production pipe shall be cemented from below any usable water to surface within **120 DAYS** of spud date. Or pursuant to Appendix "B" - Eastern Kansas surface casing order #133,891-C, which applies to the KCC District 3 area, alternate II cementing must be completed within 30 days of the spud date or the well shall be plugged. **In all cases, NOTIFY district office** prior to any cementing.

Cowley County, Kansas

To Whom it may concern,

VAL Energy Inc. requests an Exemption to the Surface Pipe, Table 1 requirement of 300ft., for the above captioned well. This well was originally drilled by Veeder Supply & Development Co who set 8-5/8" casing at 70 ft with 50 sacks of cement. We would like to deepen this well and run 5-1/2" casing to TD.

VAL Energy agrees to cement production casing from 300ft to surface at the time long string production casing is set.

Sincerely,

A handwritten signature in blue ink, appearing to read 'Dustin Wyer', with a long, sweeping underline that extends to the right.

RE: Surface Casing Exception  
House Ranch V1-30, Sec.30-T33S-R6E  
Cowley County, Kansas

Dear Mr. Wyer:

The Kansas Corporation Commission (KCC) has received your request for an exception to the Table 1 minimum surface pipe requirement of 300 feet for the proposed washdown of this well. From your request, the KCC understands that Val Energy, Inc is requesting to utilize the existing 70 feet of surface casing and Alternate II cementing rules.

After review of this matter by technical staff it was determined that:

1. Bedrock at this location is the Permian Chase Group and is located at or near surface.
2. The depth of the deepest water well of record within one mile is 200'.

Based on this information, an exception is granted for the Table 1 Minimum Surface Casing Requirements with the following stipulations:

1. Upon completion of the well, the production or long string casing nearest the formation wall shall be **immediately** cemented from a depth of at least **350** feet back to the surface. Due to the very short string of original surface casing all cementing of the production casing shall be done at the same time. The 120 day Alternate II cementing rule does not apply.
2. The KCC District #2 office must be notified prior to spudding the well.
3. The KCC District #2 office must be notified one day before cementing the production casing so staff can be onsite to witness the cementing from 350' to surface.
4. In the event the well is dry, plugging will be performed according to KCC rules and KCC District #2 requirements.

Sincerely,

A handwritten signature in blue ink, appearing to read "Ryan A. Hoffman".

Re: Drilling Pit Application  
House Ranch V1-30  
NE/4 Sec.30-33S-06E  
Cowley County, Kansas

Dear Dustin Wyer:

District staff has inspected the above referenced location and has determined that an unsealed condition will present a pollution threat to water resources.

District staff has recommended that the reserve pit be lined with bentonite or native clay, constructed **without slots**, the bottom shall be flat and reasonably level and the free fluids must be removed. The fluids are to be removed from the reserve pit after drilling operations have ceased.

**If production casing is set all completion fluids shall be removed from the working pits daily. NO completion fluids or non-exempt wastes shall be placed in the reserve pit.**

The fluids should be taken to an authorized disposal well. Please call the District Office at (316) 337-7400 when the fluids have been removed. Please file form CDP-5 (August 2008), Exploration and Production Waste Transfer, through KOLAR within 30 days of fluid removal.

**A copy of this letter should be posted in the doghouse along with the approved Intent to Drill.** If you have any questions or concerns please feel free to contact the District Office at (316) 337-7400.
