REFERENCE WELLS

1. A.P.F. - Maffett # 1-32, 2010 EWL + 350' EWL Sec. 32-25-23W

REMARKS: This well ran 9 feet higher on the Lansing top than the reference well. The Arbuckle was not present in the Lang # 1. After reviewing DST and open hole log data, it was decided production casing would be cemented to further test this well. The zones at 3422 + 3424 and 3411 + 3413 should be tested.
