RE: Request for Cathodic Wellbore Surface Casing Exception
Facility 230-2018 #1
Sec. 31-T26S-R1E, Sedgwick County.

Dear Mr. Briceland:

The Kansas Corporation Commission has received your request for an exception to the minimum surface pipe requirement for a single aquifer cathodic well bore completion as set out in K.A.R. 82-3-702(b)(3). From your request, the KCC understands that you are requesting to drill the borehole to a depth of 100 feet and place the anodes at 10' intervals. The borehole will then be pre-plugged with Conducrete from TD to a depth of 10', then bentonite grout from 10' to 4' and then topsoil to surface. No surface casing will be set and no vent pipe will be needed at the surface.

After review of this matter by technical staff it was determined that the proposed construction method will adequately protect fresh and usable water in this area.

Sincerely,

A handwritten signature in blue ink, appearing to read "Ryan A. Hoffman".
