Comments

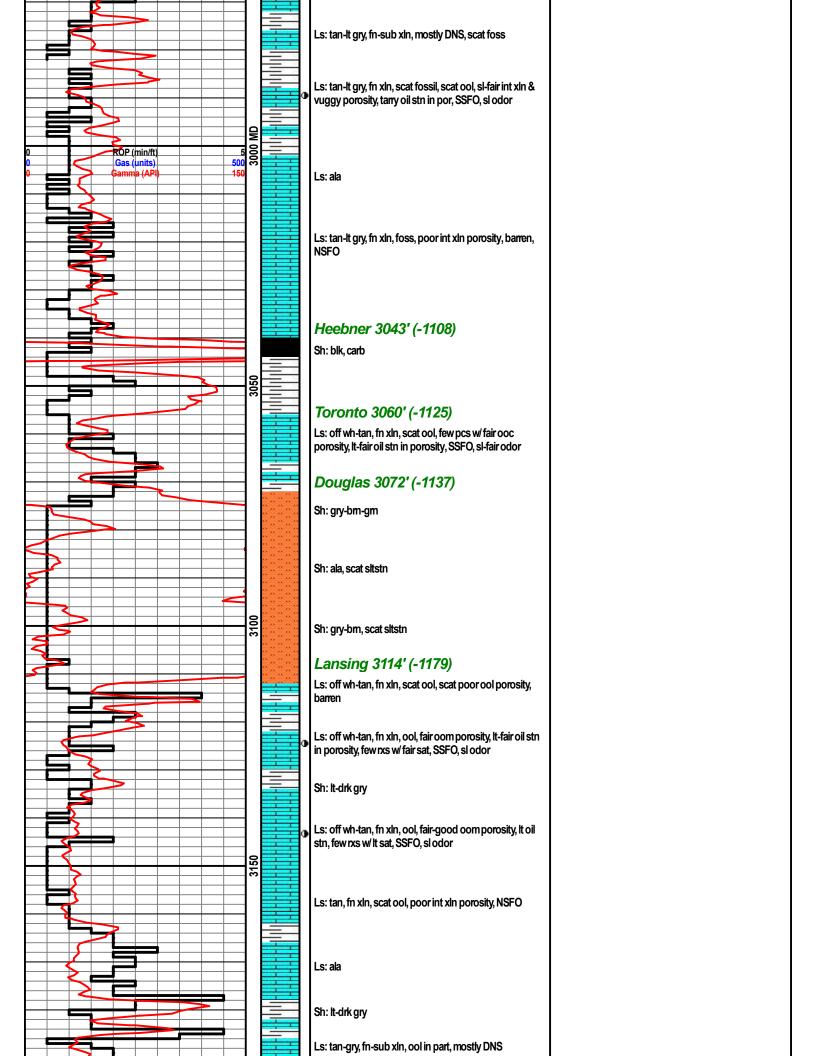

The Cropp #3 SWD well was drilled by Discovery Drilling Company Rig #2 (Tool Pusher: Travis Schmidt).

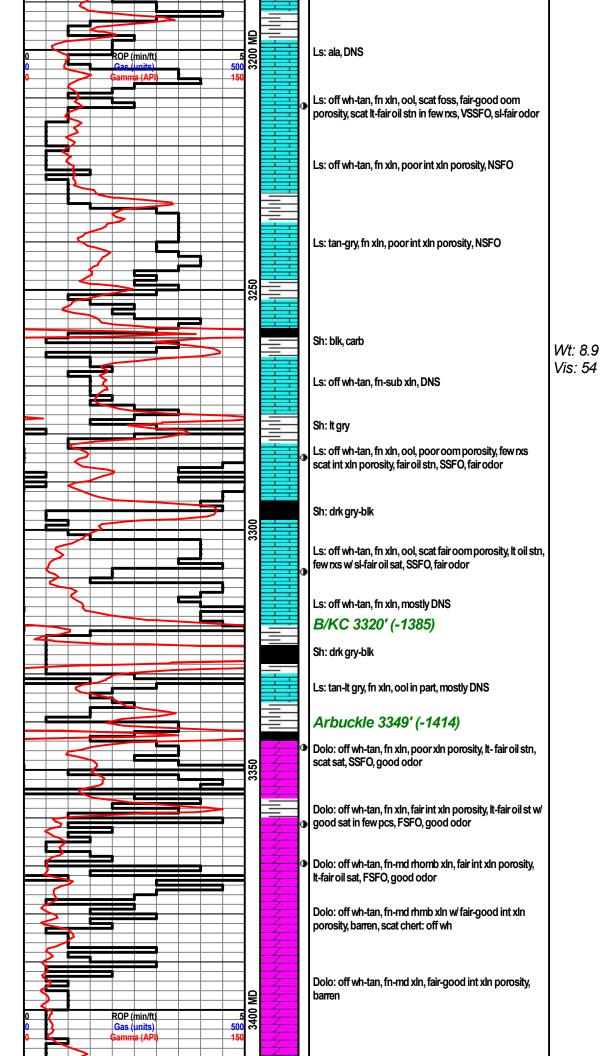

The Cropp #3 was drilled for salt-water disposal purposes. Drill time was recorded, and rock samples were collected and evaluated from 2,800'- 3,610'. Structurally, the LKC top was picked 1' high to the comparison well, located 1350' north/northwest (Bitter #2, Patterson Energy LLC: 2023). The structure thinned in the lower Lansing and the Arbuckle top was picked 6' high to the comparison well.

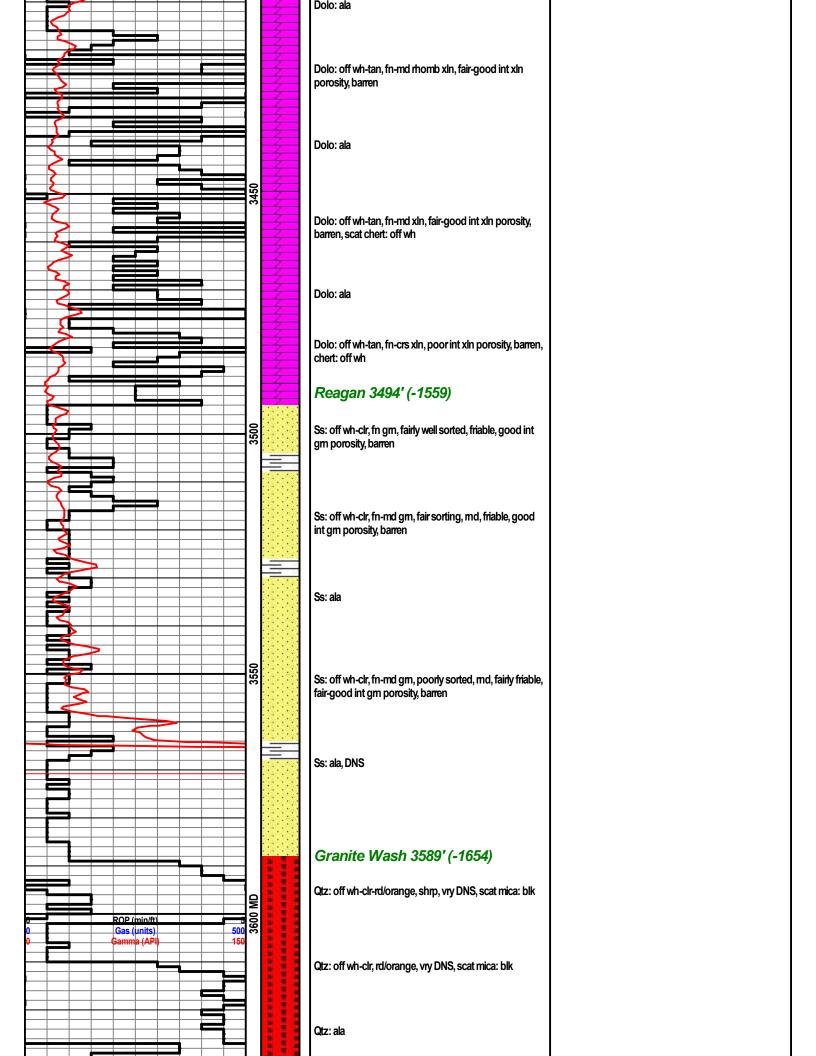

Upon conclusion of the open-hole logs, the decision was made to drill deeper into the Granite Wash. On November 5, 2023, 5-1/2" casing was set on the Cropp #3 SWD.
