Notes

1. MGP Structures are based on information from the historical Sanborn maps; locations are approximate.
2. Monitoring well clusters will consist of a shallow and deep well to be screened across the top of the water table and at the base of the unconsolidated water bearing unit, respectively.
3. Monitoring wells KCMW-3S and KCMW-5 were destroyed by construction activities to install a new water main under the railroad tracks at the east end of Everett Ave.
4. Aerial captured on March 10, 2025.
