FIRST REPORT

MAR 27 '57

Location

The diagram illustrates a geometric construction on a set of horizontal lines. A red line segment is drawn, sloping downwards from left to right. A point is marked on this segment. A red line is drawn perpendicular to the segment at this point. Another red line is drawn parallel to the segment, intersecting the perpendicular line. This setup likely demonstrates a property of parallel lines and perpendicularity, such as the fact that two lines perpendicular to the same line are parallel to each other.
