Note: In our opinion, this test was still in "Cowley" at 4173 - last sample. The Simpson-type sand in the 4170-73 drilling sample and in the 4173 circulating samples is unexplainable - unless it was accidentally introduced. If the sand is in place what happened to the Kink & Chattanooga?

Beardmore Mark!! above comments - not sent thru on log. Sample T.D 4173 Corrected T.D 4181 time will tell!

Comp. log to Beardmore for Comments.
