

17-16-24E

[illegible]

AWW 10/22/82

Top of core was about 6' of sand from a channel. More biotite ss, at base, at top. No interbeds as in 47 core 2, but thinner interval sampled.

base of core has Berier coal & good underlay.

This core was not analysed

Was N-47 average (31.4 % oil, 55% H<sub>2</sub>O) based on Core 1 or Core 2?
