Gentlemen:

Following are the results of tests run on the two core samples taken from your Kendall Well No. 1 and submitted to our laboratory on September 24, 1968:

Sample No.	1	2
Depth, Feet	706-715	722-728
Percent Porosity	20.6	16.2
Percent Oil Saturation	27.	21.
Percent Water Saturation	69.	75.
Oil Content, Bbls./A.F. 432.		264.

Note: Bbls./A.F. - Barrels per acre foot

Due to the fact that the core biscuits were so thin, we were unable to get samples for permeability tests.

Very truly yours,

OILFIELD RESEARCH LABORATORIES

Carl L. Pate
