December 12, 1990

Kansas Corporation Commission
202 W. First, #200
Wichita, Kansas 67202

Dear Sir:

On November 20, 1990 we received a notice for taking an integrity test on the Teter Lease in Section 21-23-9E, Greenwood County, Kansas.

The wells listed were Teter #8 and #9 and were in the NE/4 of Section 21-23-9E.

The Teter Lease was drilled over 70 years ago and has changed hands many times. Along with changing hands, the numbering pattern has changed and consequently the Teter #8 was previously the Teter #9 and was drilled originally as the Teter #3. It's location is Center of W/2 of the E/2 of NE Section 21-T-23 Range 9E.

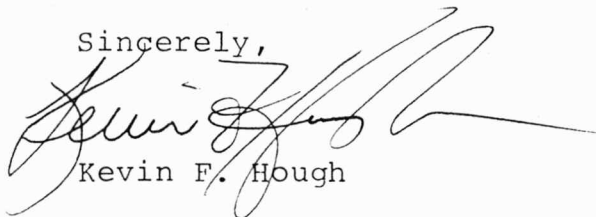

In any event this well has not been used for 6 months and was in line to be plugged this fall. As a result of your letter we contacted the Chanute District Office and on Dec. 11, 1990 we plugged this well under their supervision and recommendations.

This was and is the only injection or disposal well on this lease and at a later date we will apply for authority to make one of the producing wells into a new injection well. The lease will remain down until an approved injection well is constructed.

Mr. Andy Reed and Ron Rowe assisted in the plugging process.

Thank you for your consideration in this matter.

Sincerely,

Kevin F. Hough
