Re: Core Analysis
T & K Oil Company
Cockeyne No. A Well 26 - 22 - 21
Walnut Field
Crawford County, Kansas

T & K Oil Company
P. O. Box 204
Pittsburgh, Kansas

Gentlemen:

Subject analysis is reflected by the attached coregraph.

This well has penetrated the reservoir in an area of evident poorly developed sand, the shale occurrence in the zone of permeability between 414 and 425 feet is 20 percent or more.

It is our opinion that this well is of no value as a water injection well due to the limited appearance of the floodable sand in the section.

We have not attempted recovery calculations in this report due to the limited effective zone represented.

Yours very truly,

PRODUCTION ENGINEERING LABORATORIES
