Re: No. 1 Bannon  
Sec. 3-28S-4E  
Butler County, Kansas

Gentlemen:

Enclosed is my geological log on this well. The well ran somewhat higher than the dry hole drilled last year to the southwest. It has good shows of oil in both Arbuckle and Simpson as shown by the two drill stem tests taken.

Production is indicated in both formations. I understand you have already perforated, treated, and completed in the Arbuckle formation with positive results. I am sure that when ready you can also produce oil from the Simpson Sand logged at 2581 feet.

Sincerely,

F. W. Morgan
