Mr. W. Lynn Watney
Kansas Geological Survey
1930 Avenue A Campus West
Lawrence, Kansas 66044

Dear Lynn:

The #2 Bing was drilled 990' FNL and 990' FEL of Section 2-28S-7E, Butler County. The core is a Mississippian core and should have been sent to you at the State Geological Survey. The core was not analyzed. Enclosed is a copy of the Gamma curve that Core Lab ran and a copy of the Open Hole logs. The Mississippian was water bearing.

Yours very truly,

TXO PRODUCTION CORP.

Harold A. Brown
