Re: No. 2 House "B"  
Sec. 9-29S-4E  
Butler County, Ks.

Gentlemen:

Enclosed is my geological log on the No. 2 House "B" well. On the top of the Lansing the well ran one foot lower than the No. 1 well. Below is listed the information on the producing zone:

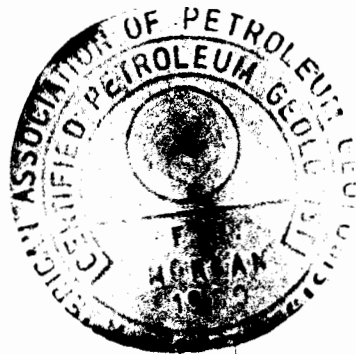

1830 - 1833 - Limestone, tan, very fine crystalline, some fossiliferous and some fine vugular porosity. Fair show of oil and gas, no odor, some light staining.

The zone does not appear to be as well developed and as a result does not carry as good a show as No. 1 did. However, it should make a small well after proper treatment.

Casing was run and landed at about 1901 feet to test the Lansing.

Sincerely,

  
F. W. Morgan
