Re: Your No. 1 Patterson  
NENENE Sec. 12-33S-2E  
Sumner County, Kansas

Gentlemen:

Enclosed is my geological log on your Patterson well. On the log are drilling time plotted to scale, lithology, formation tops and datums, shows of oil, porosity, and drill stem test results.

Each show of oil that appeared to have any merit was carefully examined and then tested or logged. We had no positive results in any of them. An electric log was run at the total depth with negative results on these zones.

As a result I have recommended that this well be plugged and abandoned as a dry hole.

Sincerely,

F. W. Morgan
