Re: No. 1 Sherwood
Sec. 5 E-35S-5E
Cowley County, Ks.

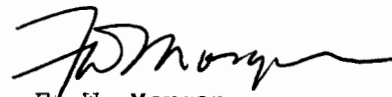

Gentlemen:

Enclosed is my geological log on the Sherwood well. Subsurface control is very sparse, but it appears that it is fairly normal on the regional dip.

The only show of oil was found in the Bartlesville Sand where free oil, etc., was logged, but the sand seemed to be pretty tight in the samples. The log showed some 6 feet of sand with eight percent porosity.

Casing was run and cemented to test this sand through perforations.

Sincerely,

F. W. Morgan
