Describe in detail the manner in which the well was plugged, indicating where the mud fluid was placed and the method or methods used in introducing it into the hole. If cement or other plugs were used state, the character of same and depth placed, from feet to feet each set. At the time of plugging, the well bore contained heavy mud of approximately 55 viscosity. A 206' Portland cement plug was placed from approximately 210' to 4' by pumping cement through the drill pipe and displacing 206' of mud. The upper 4' were filled with formation cuttings.
