

July, 1937.

British-American #4 Bemis,
SW SW SW, 22-11S-17W,
Elevation 1987'

De

Pennsylvanian conglomerate Questionable. Poor samples.

Decorah 3455-3457' Questionable if Decorah is in place
as the basal sand does not show.

Arbuckle Top 3457' Penetration 17' Sub-sea, minus 1470'
3457-3474' Miller-Purcell. This test was standard-
ized at 3460'. However, the residue
sequence suggests that less than 17'
of Arbuckle was drilled.
