

Empire # 4 Ehrlich
NE SE SE, 28-13S-14W
Elev. 1856'

Cable tool dry hole

Pennsylvanian Conglomerate

None. Soft green-gray shale with ostracods
and lime nodules rests on Arbuckle.

Arbuckle Top 3284' Penetration 6' Subsea - 1428'
3284-3290 Sandy fine to medium brown dolomite. Basal
Boyce. Corrolated with 3295'-3300' in
7 Ehrlich. Base Boyce est. 3292' or -1436'

Remarks: The above measurements are uncorrected. A correction was
made that 3283 $\frac{1}{2}$ ' equals 3298', making the top of the
Arbuckle -1442'. This correction does not appear valid.
