Cities Service, # B-1 Rogg  
CSL SE, 20-14s-13w  
Elev. 1773' DF, 13✓

Rotary to 3204'

Pennsylvanian Conglomerate

None

Arbuckle Top 3196'  
3196-3204

Penetration 13'  
Dolomitic sand, oilstained. About 80% sand, medium and coarse grains, recrystallized, in friable clusters. Samples rather poor due to coring this interval. Pre Cotter. Probably middle Boyce.

Subsea -1423'

3204-3209 No drilling in samples. Test made HPW at 3209' TD.

Remarks: Lansing Producer.  
Base of Boyce sand estimated at 3223' or Subsea -1450' E
