

April 1934

Prairie #1 Rude,  
NW corner SE, 26-15S-13W, PC<sup>✓</sup>  
Elevation 1880'.  
1875 DF<sub>40</sub> (Printed)

Pennsylvanian conglomerate 3316-3321'

3316-3321 Marine limes with included coarse sand. No conglomerate proper and no residual zone.

Ordovician Top 3321'

Sub-sea, minus 1441'

Arbuckle " " Penetration 25' " " " "

3321-3346 Pre-Cotter. The 25' is represented by eleven samples, which gives good detail. There is sufficient penetration to show the normal chert content below the zone of secondary chert. The pre-Cotter identification is clean-cut.

3321
