

November, 1936.

Bridgeport #2 Madden,
NE NW NW, 26-15S-18W,
Elevation 1999'.

Pr~C

Pennsylvanian conglomerate 3564-3589'
3564-3580 Chert conglomerate; with some sand and sandy
clay shale.
3580-3589 Chert, weathered, somewhat porous. Probably
residual chert from Basal Cotter and the
upper part of the Pre-Cotter.

Ordovician Top 3589' Penetration 6' Sub-sea, minus 1590'
Arbuckle " " " " " "
3589-3595 Dolomite. Probably in the upper part of the
Pre-Cotter but sequence is not long enough
to place it with any accuracy.
