Sinclair, # 4 Selma Seyfort
Sec. 28-16s-11w, SE NW Rotary
Elev. 1926' DF, GL

Pennsylvanian conglomerate
Upper part of interval below may be conglomerate.

Land Wash or Residuum of Arbuckle 3355-3377' Subsea -1429'

3355-3377 Chert. Light colored and white cherts, translucent to milky, showing light buff clay contacts. Some quartzose oolitic chert from Cotter, but most of the chert is type which could be derived from milky break near top of Pre Cotter. Residual sequence not clear from rotary samples. Probably residuum, possibly land wash.

Arbuckle Top 3377' Penetration 8' Subsea -1451'

3377-3385 Dolomite, white, coarsely crystalline. Poorly shown in uncirculated rotary samples, taken while coring. Post Boyce.

Remarks: Test abandoned.
