

March, 1936.

Marathon #1 Mohr.
C SW $\frac{1}{4}$, 2-18S-16W.
Elevation 1997'

15-165-02057-7

Pennsylvanian conglomerate 3490-3504
3490-3495 Gray lime and green sandy clay shale.
3495-3500 Clay shale with included arkose.
3500-3504 No sample.

Pre-Cambrian Top 3504' Sub-sea, minus ~~2504~~ 1507'
3504-3540 Granite, slightly weathered,
or coarse arkose. There is no question but
what 3540' is solid, unweathered, granite.
