

December, 1939.

Virginia #1 Schlocktermeyer,  
SE SE NW, 7-21S-11W,  
Elevation 1813'.

Pennsylvanian conglomerate, 3418-3420'.  
3418-3420 Stained chert conglomerate.

Decorah 3420-3456' 36'  
3420-3456 Red and green shales and rare sand.

Arbuckle Top 3456' Penetration 124' Sub-sea, minus 1643'.  
3456-3492 Miller. The contact between Upper and Lower Miller  
is not well shown  
3492-3525 Purcell  
3525-3580 Cotter

This test had a good show of oil in the Upper Miller.  
Attempts to make a producer made the samples some-  
what messy through the Miller. However, there is  
no evidence of solution, in fact, the only porosity  
appears to be of the fracture type.  
Restored top same as actual top.
