Jim:

Included are a couple of copies of my description of the #1 Rose core. This informal manner of information transfer avoids a lot of red tape, transmittal letters etc; but still gets the job done.

After talking to you and saying that I was returning the core to Lawrence, our Houston office decided that they want to see the core and also have it photographed. I am therefore holding the core in Tulsa for a few more weeks. I will do my best to get a set of photographs for you.

Should you obtain further information concerning the #1 Rose I would appreciate receiving same.

Thanks for your cooperation
Red Spannberg.

P.S. Stan Bull will be one of the persons looking at the core for Houston.
