

- SKELLY GETS NICE PRODUCER IN STAFFORD CO.-

SKELLY Oil Company is opening a nice pool in 25-14W, Stafford county, at the #1 Kipp, Sec NE of Section 27. The well has potential of 1265 barrels from Lansing series. It was drilled to 4250 feet, getting water in Siliceous topped at 4240 feet, then plugged back to 3906 feet to test the Lansing topped at 3682 feet.

THE potential of 1265 barrels was established through 2-inch tubing after well had been acidized with 5,000 gallons.

TO THE north of the Skelly #1 Kipp, and shown on above map, is Atlantic #1 Jordan, Section 15-25-14W. This also was a Lansing producer, making 463 barrels at 3729', after topping Lansing at 3640', and acidizing with 2,000 gallons. It now is drilling deeper, encountering Viola at 4050' and is drilling below 4170' with nothing showing.
