Rupe Oil Company has finalized the #1 David Britton, C NE NE of 8-26-18W, for a four point calculated open flow of 21,450,000 cubic feet of gas per day. The production is from Mississippian perforations 4684-98 feet and top of the Mississippian was logged at 4660 (-2470'KB). The new discovery is one and three fourths miles north of the Case (Lansing oil/Mississippian gas) Field and one and one half miles northeast of the Bordewicke (Wabaunsee gas) Field.
