Re: Bates unit #2-2
NW SW Sec. 31-T30S-R1W
Sumner County, Kansas

Dear Mr. Spexarth:

The well in question is currently shut in as uneconomical to produce with the latest well test showing no oil and 107 BWPD. It is under study for possible stimulation or recompletion potential. If the well is to be plugged and abandoned you will be notified in advance of our intentions.

Thank you for your concern. If you have any more questions, please direct them to this office.

Yours very truly,

S. J. Reynolds
Area Manager
