Mr. Everett Tracy
Horizon Oil & Gas
Box 7
Spearman, Texas

Dear Everett,

Enclosed is a typed copy of the Adams "A" drilling time. I have also plotted the drilling time, corrected to log depths, from 5900' to T.D.

If I were to vote on where to perforate the St. Louis and Ste. Genevieve, I would think of something like follows:

St. Louis

1 hole each @

6134 6114
6133 6113
6132 6112
6129 6111
6127 6109
6125 6107
6123 6105
6121 6103
6119 6101
6117 6099
6115 6097
6095

Test and treat separately.
23 holes

Ste. Genevieve

1 hole each @

6065 6055
6064 6053
6063 6051
6062 6050
6061 6047
6059 6045
6057 6043
6041

Test and treat separately.
15 holes

I'm sure you will have some better thoughts on how to perforate each of these zones which would be better mechanically. In my present uninformed state, however, the above represents my present thoughts.

Whatever you choose to do will have my complete approval and confidence.

Sincerely,

Bill
