RE:

Byrom #1-34

Sec. 34, T20S-R23W Ness County, KS

Enclosed please find the required documentation for the above referenced well, specifically:

ACO-1 (original, two copies)
Logs (DIL, CNL/CDL, Sonic)
Geologist Report
Cementing Tickets (Surface Casing and P&A)
Plugging Form CP-4

Please be advised the well was drilled in the wrong location. Attached is a third party survey performed after the fact that shows the location where the well was drilled was mis-staked. I didn't know how to submit the information. Paperwork is submitted to be consistent with the location listed on the Intent (C-1) as 2545' FNL & 1255' FWL because as far as we knew that is where the well was drilled. It wasn't until later that it was found to be located 2362' FNL & 1172' FWL. This is not a "moved location" by operator choice. We are currently working through the situation. Norstar will likely drill another well at the correct location in 2004. Please advise or call if you have any questions.

Sincerely,

Clark D. Parrott, P.E.

Petroleum Engineer
