Dear Mr. Williams:

The referenced wells were permitted to plug and abandon on December 24, 1997. Since that time, wet locations have kept PMI from plugging the wells. As we neared the end of the 90 day permit period, the Hays KCC office was contacted, and PMI was given a verbal OK to extend the permit period for a few days.

To date the weather continues to be wet and muddy, therefore, PMI hereby requests an official extension or renewal of the plugging permits on these wells to allow for better location conditions.

Very truly yours;

Gary L. Reed
Consulting Engineer

Dear Don Keener,

This letter is to notify you that the Conservation Division is in receipt of your plugging proposal, form CP-1, for the above-captioned well.

Your CP-1 has been reviewed by the Conservation Division central office for completeness and to verify license numbers. The plugging proposal will now be forwarded to the district office listed below for review of your proposed method of plugging.

Please contact the district office for approval of your proposed plugging method at least at five (5) days before plugging the well, pursuant to K.A.R. 82-3-113 (b). If a workover pit will be used during the plugging of the well it must be permitted. A CDP-1 form must be filed and approved prior to the use of the pit.

The Conservation Division's review of form CP-1, either in the central or district office, does not include an inquiry into well ownership or the filing operator's legal right to plug the well.

This notice in no way constitutes authorization to plug the above-captioned well by persons not having legal rights of ownership or interest in the well. This notice is void after ninety (90) days from the above date.

Sincerely,

David P. Williams
Production Supervisor
