Dear Mr. Williams,

I talked with David Wann at the District 4 office in Hays this morning. Because of weather problems in the area, Northwest Well Service is running behind schedule in plugging numerous wells in the area.

As the plugging applications that you approved in July for the above referenced wells have exceeded their time limits, he asked that I submit new CP-1 applications for the wells.

Both of these wells are inaccessible during wet or snowy weather, so as soon as it either dries out or freezes solid again Northwest Well Service plans to move on location and plug them.

Yours truly,

Roger W. Philpott

Dear Roger W. Philpott,

This letter is to notify you that the Conservation Division is in receipt of your plugging proposal, form CP-1, for the above-captioned well.

Your CP-1 has been reviewed by the Conservation Division central office for completeness and to verify license numbers. The plugging proposal will now be forwarded to the district office listed below for review of your proposed method of plugging.

Please contact the district office for approval of your proposed plugging method at least at five (5) days before plugging the well, pursuant to K.A.R. 82-3-113 (b). If a workover pit will be used during the plugging of the well it must be permitted. A CDP-1 form must be filed and approved prior to the use of the pit.

The Conservation Division's review of form CP-1, either in the central or district office, does not include an inquiry into well ownership or the filing operator's legal right to plug the well.

**This notice in no way constitutes authorization to plug the above-captioned well by persons not having legal rights of ownership or interest in the well.
This notice is void after ninety (90) days from the above date.**

Sincerely,

A handwritten signature in cursive script that reads "David P. Williams".
